Farmers are people who raise animals and/or crops for a living. Farmers make sure pigs are healthy and well fed.

Barns protect farm pigs from bad weather like rain and snow.

Feeding Time is when farmers feed their pigs ground up corn, soybeans, wheat or sorghum with vitamins and minerals for pigs to grow healthy and strong.

Crops are plants grown by farmers. Crops are harvested and the grain can be used to feed pigs.

Farrowing is when the mother pig gives birth to piglets. There are usually 8-12 piglets in a litter.

Breeds of Pigs Pigs on farms today are descendants of these pigs.

Parts of a Pig

Wheat
Soybeans
Sorghum
Corn
